DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, does not provide support for the claimed subject matter of "an adhesive comprising a first component having mutual dissolubility with the impregnating resin" as now recited in claims 1, 2, 13, and 16.

Applicant, in the remarks filed on 10/24/2005, states that the feature of "an adhesive comprising a first component having mutual dissolubility with the impregnating resin" is consistent with the disclosure at page 11, lines 11-22, page 14, lines 17-20, and page 15, lines 22-25. Examiner agrees that the disclosure, as pointed out by the applicant, does support the adhesive comprising a first

component which is epoxy resin. However, there is no description supporting the feature of the first component having mutual dissolubility with the impregnating resin.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 13-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13, line 6, "the impregnating resin" lacks antecedent basis.

Claim 16, line 6, "the impregnating resin" lacks antecedent basis.

Claims 14, 15, 17, and 18 are included in this rejection because of dependency.

Allowable Subject Matter

5. Although the claimed subject matter of "an adhesive comprising a first component having mutual dissolubility with the impregnating resin and a second glue component insoluble in the impregnating resin" in combination with other

features recited in claims are found to be allowable, such limitations raise new matter. Applicant is required to cancel the new matter limitations.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 2, 13 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Summary

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
